

Regarding the recently lobbying by the National Association of Broadcasters, I would like to say that it should not be up to this organization to dictate what XM Radio and Sirius Radio are allowed to offer to its SUBSCRIBERS. I have bolded the SUBSCRIBERS word, because we pay for this service, therefore it should be able to cater to any need it sees fit best for its subscribers. Please put this proposed bill to the side, it is not worth your or the American people's time.
